DETAILED ACTION

Claims 1-34 remain pending

Response to Arguments

The applicants arguments filed on December 12, 2002 have been fully considered.

The Examiner states that Claim 1-58 allowable over the prior art record.

Claim 59

The applicant states that the Examiner has not particularly pointed out an electronic wallet in which Yacobi receives a run of assets, and further where a subset of assets are presented to an auditor for fraudulent expenditure.

The examiner apologizes for the previous omission, the following rejection cites the pertinent material in both the Yacobi and Demers references.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 59 and 60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Briscoe (US Patent 6,341,273) and further in view of Yacobi (US Patent 5,878,138).

As per claim 59

Briscoe (273) discloses an electronic wallet having memory and a processor,(Figure 2) Briscoe ('273) does not explicitly disclose the electronic wallet being programmed to: receive a run of assets from a user; select a subset of less than all of the assets received from the user; submit the subset of assets to an auditor for evaluation of fraudulent expenditure.

Yacobi ('138) discloses the electronic wallet being programmed to:

receive a run of assets from a user;(Column 5, lines 9-28)

select a subset of less than all of the assets received from the user; (column 16, lines 48-

57)

submit the subset of assets to an auditor for evaluation of fraudulent expenditure.(column 3, lines 42-53).

Art Unit: 3621

It would have been obvious to one having ordinary skill in the art of electronic transactions at the time the invention was made to combine the Briscoe ('273) method with the Yacobi ('138) method in order to guarantee the validity of the data specified by the vendor.

As per claim 60,

Briscoe (273) discloses an electronic wallet as recited in claim 59, (Figure 2)

Briscoe ('273) does not explicitly disclose further programmed to randomly select the subset of assets.

Yacobi ('138) discloses programmed to randomly select the subset of assets.(column 16, lines 48-57)

It would have been obvious to one having ordinary skill in the art of electronic transactions at the time the invention was made to combine the Briscoe ('273) method with the Yacobi ('138) method in order to guarantee the validity of the data specified by the vendor.

Allowable Subject Matter

Claims 1-58 are allowed
